## SERIES CAS - INLET / OUTLET ABSORPTION SILENCER

Series CAS Silencers are designed especially for use with Centrifugal Blowers and Exhausters.

These Silencers are constructed of welded steel sheet and plate. The unit incorporates a perforated center shell that retains an acoustic absorption material to silence the frequencies frequently found in multistage centrifugal blowers and exhausters.

Part Number	A (inch)	B (inch)	C (inch)	WGT. (lbs)
CAS-4	4	10	23	40
